

# How Does Glyphosate Exposure Affect Children's Health?

## 1 BRAIN

Glyphosate can cause developmental delays, poor memory and motor skills, and higher rates of ADHD

## 2 LUNGS

Glyphosate is a respiratory irritant and can cause asthma

## 3 ENDOCRINE SYSTEM

Glyphosate interferes with hormones in the body, which can impact brain development and organ function

### DID YOU KNOW?

Chronic or long-term exposure to glyphosate has been linked to childhood cancers such as brain tumors and leukemia.
